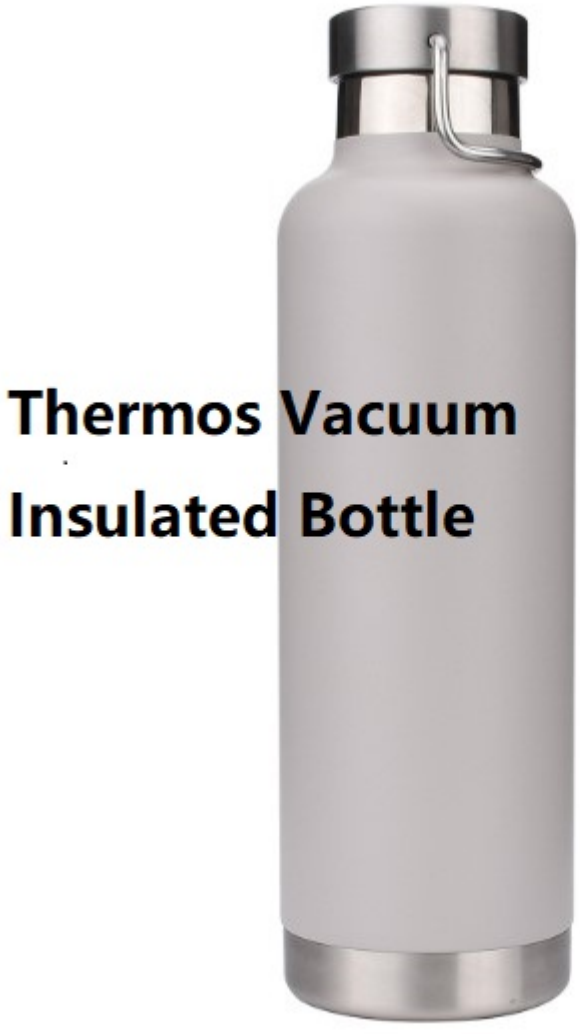
Yongkang Aijun Industry & Trade Co., Ltd.: Delivering Reliable Drinkware Solutions Through Innovation and Manufacturing Excellence

Company Overview

Yongkang Aijun Industry & Trade Co., Ltd. is a professional manufacturer specializing in the research, development, production, and supply of high-quality stainless steel drinkware and outdoor lifestyle products. Located in Yongkang, Zhejiang Province, China, a city widely recognized for its strong manufacturing foundation and advanced industrial capabilities, the company has developed extensive experience in creating practical, durable, and stylish beverage containers for customers worldwide.

Since its establishment, Yongkang Aijun Industry & Trade Co., Ltd. has been dedicated to providing reliable drinking solutions that combine modern design concepts, advanced manufacturing techniques, and strict quality management. With years of expertise in metal product manufacturing, the company has continuously improved its production capabilities and expanded its product categories to meet the changing demands of global markets.



Aijun focuses on creating products that support convenient lifestyles, outdoor activities, travel experiences, and daily hydration needs. Through professional manufacturing processes, skilled technical teams, and a customer-oriented business philosophy, the company has established a strong reputation among international buyers seeking dependable drinkware products.

The company places great importance on product innovation, material selection, and manufacturing efficiency. By integrating advanced equipment with experienced craftsmanship, Aijun ensures that every product meets practical usage requirements while maintaining attractive appearance and long-term durability.

With a commitment to quality and continuous improvement, Yongkang Aijun Industry & Trade Co., Ltd. continues to develop competitive solutions for customers in different regions and industries. The company aims to become a trusted manufacturing partner by delivering products that combine functionality, reliability, and modern lifestyle values.

Product Range

At Yongkang Aijun Industry & Trade Co., Ltd., we specialize in manufacturing a wide variety of stainless steel drinkware products designed for different applications. Our product portfolio includes vacuum bottles, insulated tumblers, sports bottles, travel mugs, coffee cups, and customized beverage containers.

Each product category is developed according to different usage environments, providing customers with flexible choices for personal use, promotional activities, outdoor adventures, and commercial applications.

1. Vacuum Insulated Bottles

Vacuum insulated bottles are one of the company's major product categories, designed to

provide excellent temperature retention performance and convenient daily use. These products are widely used by consumers who require reliable containers for keeping beverages warm or cold during work, travel, sports, and outdoor activities.

The manufacturing process focuses on combining high-quality stainless steel materials with advanced insulation technology. Through careful structural design and precise production methods, the bottles provide stable performance while maintaining a lightweight and portable structure.

The company's Thermos Vacuum Insulated Bottle products are developed to meet modern hydration requirements by offering excellent insulation capability, durable construction, and user-friendly features. These bottles are suitable for various environments, including offices, schools, gyms, camping activities, and long-distance travel.

Key Features of Vacuum Insulated Bottles:

- **Effective temperature preservation for hot and cold beverages**
- **Made with durable stainless steel materials**
- **Strong resistance to daily wear and corrosion**
- **Easy to carry with portable designs**
- **Suitable for indoor and outdoor applications**
- **Available with different capacities and appearance options**

● Easy cleaning and convenient maintenance

Aijun continuously improves its bottle designs according to market trends and customer feedback, ensuring that products provide both practical value and comfortable user experiences.

2. Stainless Steel Tumblers

Stainless steel tumblers represent another important product category offered by Yongkang Aijun Industry & Trade Co., Ltd. These products are designed for customers who prefer convenient drinking solutions with modern styles and reliable performance.

Tumblers are commonly used in workplaces, homes, vehicles, and outdoor environments. Their ergonomic designs make them easy to hold, transport, and use throughout the day.

By applying advanced manufacturing techniques, Aijun produces tumblers with smooth surfaces, secure lids, and durable structures. Different colors, shapes, and capacities can be developed according to customer requirements, allowing businesses to create customized products for various markets.

Key Features of Stainless Steel Tumblers:

● Modern and practical appearance designs
● Comfortable grip structures
● Strong durability for repeated use
● Suitable for beverages such as water, coffee, and tea
● Customization options for different customer needs
● Reliable sealing performance

The company focuses on balancing aesthetics and functionality, helping customers receive products that match both market expectations and consumer preferences.3. Sports Bottles and Outdoor Drinkware

With the increasing popularity of outdoor activities and healthy lifestyles, sports bottles have become an important part of modern hydration solutions. Yongkang Aijun Industry & Trade Co., Ltd. develops and manufactures various sports drinkware products designed for people who participate in fitness training, hiking, cycling, traveling, and other outdoor activities.

The company understands that outdoor users require products that are lightweight, strong, and easy to carry. Therefore, Aijun focuses on optimizing bottle structures, improving usability, and selecting suitable materials to create products that can adapt to different environments.

Sports bottles manufactured by Aijun combine practical functions with attractive designs. Features such as leak-resistant lids, comfortable handling structures, and convenient drinking methods help users enjoy a better experience during daily activities and outdoor journeys.

Key Features of Sports Bottles:

● Lightweight designs for convenient transportation
● Durable materials suitable for frequent use
● Secure closures to prevent leakage
● Comfortable shapes for holding and carrying
● Suitable for sports, travel, and outdoor activities
● Various designs and capacity choices available

Through continuous product improvement, Aijun provides drinkware solutions that support active lifestyles and meet the expectations of different consumer groups.

4. Customized Drinkware Solutions

Customization is an important service provided by Yongkang Aijun Industry & Trade Co., Ltd. The company understands that different customers may have unique requirements regarding product appearance, structure, packaging, and branding presentation.

By combining professional manufacturing experience with flexible production capabilities, Aijun can provide customized solutions for businesses, distributors, and organizations. Customers can choose different product styles, colors, sizes, surface treatments, and packaging options according to their market positioning.

Customized drinkware products are widely used in promotional activities, corporate gifts, retail markets, and special events. Aijun works closely with customers throughout the development process, from initial design communication to final production, ensuring that each product meets specific expectations.

The company's customization services include:

● Customized product appearance design
● Various color and surface finishing options
● Different capacity selections
● Personalized packaging solutions
● Flexible production arrangements
● Professional manufacturing support

By providing comprehensive customization services, Aijun helps customers develop unique products that strengthen their market competitiveness and satisfy end-user preferences.

Advanced Manufacturing Process

To maintain stable product quality and production efficiency, Yongkang Aijun Industry & Trade Co., Ltd. has established a complete manufacturing system supported by advanced equipment and experienced production teams.

The company applies strict management procedures throughout every production stage, including material preparation, forming, welding, polishing, assembly, inspection, and packaging. Each step is carefully controlled to ensure product consistency and reliability.

The manufacturing process begins with the selection of high-quality raw materials. Stainless steel materials are carefully evaluated to ensure they meet requirements for durability, safety, and long-term use. Professional production methods are then applied to transform raw materials into finished drinkware products.

During forming processes, advanced machinery is used to create accurate product structures and maintain consistent dimensions. Welding technology ensures strong connections between different components, while polishing procedures improve surface quality and product appearance.

For insulation products, the company applies specialized production techniques to achieve effective temperature retention performance. Every manufacturing detail is carefully

considered to ensure the final products provide reliable daily performance.

The main production procedures include:

Material Selection

Aijun carefully selects suitable materials according to product requirements. High-quality stainless steel is commonly used because of its durability, corrosion resistance, and suitability for beverage containers.

Product Forming

Advanced forming equipment helps create accurate bottle shapes and structures. Professional operators monitor production conditions to maintain stable quality.

Welding and Assembly

Precise welding techniques are applied to ensure strong product structures. Components such as lids, handles, and accessories are assembled carefully to achieve smooth operation.

Surface Treatment

Surface finishing processes improve product appearance and provide additional protection. Different finishing methods can be applied according to customer preferences.

Quality Inspection

Before products are delivered, they undergo comprehensive inspections to verify appearance, function, and performance. This helps ensure every shipment meets customer expectations.

Through efficient manufacturing management and continuous process optimization, Yongkang Aijun Industry & Trade Co., Ltd. maintains reliable production capability and provides consistent product quality for customers around the world.

Quality Control and Certification

Quality control is a fundamental principle of Yongkang Aijun Industry & Trade Co., Ltd. The company believes that reliable products are created through strict management, careful inspection, and continuous improvement.

Aijun has established a complete quality management system covering raw materials, production processes, and finished products. Professional quality teams conduct inspections at different stages to identify and solve potential issues before products reach customers.

The company pays close attention to every manufacturing detail, including product appearance, structural strength, sealing performance, and functional reliability. These inspection procedures help maintain stable quality standards across different production batches.

The company's quality control procedures include:

- **Incoming material inspection**
- **Production process monitoring**
- **Product appearance evaluation**

● Functional performance testing
● Packaging quality checks
● Final shipment inspection

For insulated drinkware products, performance testing is conducted to evaluate insulation effectiveness, durability, and usability. These testing procedures ensure that products can provide dependable service in different application environments.

Aijun also emphasizes continuous improvement by collecting customer feedback and optimizing manufacturing methods. Through quality-focused operations, the company aims to build long-term cooperation with customers and provide dependable drinkware solutions.Sustainable Practices

As a responsible manufacturer, Yongkang Aijun Industry & Trade Co., Ltd. recognizes the importance of sustainable production and environmentally conscious manufacturing. The company continuously explores methods to reduce resource consumption, improve production efficiency, and create products that support reusable lifestyles.

Stainless steel drinkware itself provides an alternative solution to disposable beverage containers by encouraging repeated use and reducing dependence on single-use products. Aijun focuses on developing durable products with long service life, helping customers enjoy practical drinking solutions while supporting more sustainable daily habits.

During the manufacturing process, the company pays attention to material utilization and production management. Through optimized manufacturing procedures, Aijun works to reduce unnecessary waste and improve the efficiency of raw material usage.

The company also emphasizes responsible production practices by improving equipment performance, strengthening quality management, and continuously reviewing manufacturing procedures. These efforts help maintain stable product quality while supporting more efficient resource management.

Key Sustainable Manufacturing Approaches:

● Optimized material utilization during production
● Development of reusable stainless steel products
● Reduction of unnecessary manufacturing waste
● Improved production efficiency through advanced equipment
● Focus on long-lasting product performance
● Continuous improvement of environmental management methods

Aijun believes that sustainable development is not only related to environmental responsibility but also connected with creating products that provide long-term value for customers. By combining practical design with responsible manufacturing, the company continues to contribute to a more efficient and sustainable product ecosystem.

Research and Development

Innovation plays an important role in the long-term development of Yongkang Aijun Industry & Trade Co., Ltd. The company continuously invests in product improvement, manufacturing technology, and design development to meet the changing requirements of global markets.

With professional experience in stainless steel drinkware production, Aijun has established strong capabilities in product research and customized development. The company's technical

team focuses on improving product structures, enhancing user experiences, and creating solutions that match different market demands.

Research and development activities cover various aspects, including product appearance, functional improvements, production techniques, and customization solutions. By analyzing market trends and customer feedback, Aijun continuously develops new product concepts suitable for different application scenarios.

The company pays special attention to details that influence product performance, such as insulation structures, sealing systems, ergonomic designs, and surface treatments. These improvements help create drinkware products that are convenient, reliable, and attractive.

Aijun also provides OEM and ODM development services, allowing customers to transform their ideas into finished products. From initial concept discussions to prototype development and mass production, the company offers professional support throughout the entire process.

Main R&D Advantages:

- **Experienced technical development team**
- **Flexible product customization capabilities**
- **Continuous improvement of manufacturing methods**
- **Focus on practical product innovation**
- **Support for unique customer requirements**
- **Professional design and production cooperation**

Through ongoing innovation, Yongkang Aijun Industry & Trade Co., Ltd. aims to strengthen its manufacturing capabilities and provide customers with more effective product solutions.

Customer Satisfaction and After-Sales Service

At Yongkang Aijun Industry & Trade Co., Ltd., customer satisfaction is considered one of the most important factors for long-term business development. The company understands that successful cooperation depends not only on product quality but also on professional communication, reliable service, and efficient support.

Aijun works closely with customers from the beginning of product consultation through manufacturing and delivery. The company provides professional assistance in product selection, customization requirements, production arrangements, and technical communication.

For customers seeking customized drinkware solutions, Aijun offers flexible cooperation methods according to different business needs. The company's experienced teams help customers understand product possibilities and develop suitable solutions based on their target markets.

Customer service includes:

- **Product consultation and technical communication**
- **Customized design assistance**
- **Production progress updates**
- **Quality inspection coordination**
- **Shipping and order support**
- **After-sales communication**

The company believes that strong customer relationships are built through trust, responsibility, and consistent service. Therefore, Aijun continuously improves its service system to ensure customers receive efficient support throughout cooperation.

By focusing on customer needs and maintaining open communication, Yongkang Aijun Industry & Trade Co., Ltd. has developed lasting partnerships with customers in different markets.

Global Market Reach

With professional manufacturing capabilities and a commitment to quality, Yongkang Aijun Industry & Trade Co., Ltd. has expanded its business presence in international markets. The company provides stainless steel drinkware solutions for customers from different regions, including distributors, retailers, and commercial partners.

Aijun's products are designed to meet diverse market requirements by combining practical functions, modern appearance, and reliable manufacturing standards. The company continuously studies global consumer trends and adjusts product development strategies to better serve international customers.

The company's export experience enables it to understand different market expectations regarding product design, packaging, quality requirements, and customization services.

Through cooperation with global customers, Aijun has gained valuable experience in handling different project requirements and delivering products according to specific market conditions.

The company's international business advantages include:

● Professional manufacturing experience
● Flexible production capabilities
● Customized product development support
● Stable quality management
● Efficient communication with overseas customers
● Ability to support different order requirements

Aijun continues to explore new opportunities in international markets while strengthening existing customer relationships. The company aims to become a dependable manufacturing partner for businesses looking for professional drinkware production solutions.

Company Vision and Future Development

Yongkang Aijun Industry & Trade Co., Ltd. continues to move forward with a clear vision of becoming a professional and reliable partner in the global drinkware manufacturing industry. The company believes that long-term success depends on continuous innovation, stable product quality, responsible manufacturing, and close cooperation with customers.

With changes in consumer lifestyles and increasing demand for practical reusable products, the drinkware market continues to develop with new opportunities. Aijun actively follows these changes by improving product designs, optimizing production methods, and expanding its manufacturing capabilities.

The company's future development strategy focuses on several important areas, including product innovation, production efficiency, service improvement, and international cooperation. By strengthening these areas, Aijun aims to provide more valuable solutions for customers and create stronger connections with partners around the world.

In product development, the company will continue exploring new structures, materials, and functional designs to meet different application requirements. Modern consumers expect drinkware products to provide not only basic functions but also convenience, portability, and attractive appearance. Aijun is committed to responding to these expectations through continuous improvement.

In manufacturing, the company plans to further enhance production management systems and introduce improved technologies to increase efficiency and maintain consistent quality. By combining advanced equipment with experienced production teams, Aijun continues to build a strong foundation for future growth.

The company also places great importance on customer relationships. By providing professional communication, flexible customization options, and reliable service, Aijun aims to establish long-term partnerships with customers from different industries and regions.

Future Development Goals:

- **Continue improving product innovation capabilities**
- **Expand manufacturing efficiency and production flexibility**
- **Strengthen quality management systems**
- **Provide more customized solutions for global customers**
- **Develop long-term partnerships through reliable service**
- **Adapt to changing market requirements with professional strategies**

Through continuous efforts and responsible business practices, Yongkang Aijun Industry & Trade Co., Ltd. is prepared to embrace future opportunities and contribute to the development of modern drinkware solutions.

Professional Manufacturing Capability and Product Advantages

Yongkang Aijun Industry & Trade Co., Ltd. has developed comprehensive manufacturing capabilities through years of experience in stainless steel product production. The company combines professional knowledge, advanced production equipment, skilled employees, and strict management systems to deliver products that meet various customer requirements.

From product design to final delivery, every stage is carefully managed. The company understands that successful manufacturing requires attention to detail, efficient communication, and strong cooperation between different departments.

Aijun's manufacturing advantages include:

Experienced Production Team

The company has a professional team with experience in product development, manufacturing, quality inspection, and customer service. Employees understand production requirements and work together to maintain smooth operations.

Flexible Production Management

Different customers may have different requirements regarding product specifications, quantities, designs, and delivery schedules. Aijun provides flexible manufacturing arrangements to support various business models.

Strict Quality Monitoring

Quality management is integrated into every production stage. By applying inspection procedures and production controls, the company helps ensure stable product performance and customer satisfaction.

Product Customization Support

Aijun provides customized manufacturing services to help customers create products suitable for their markets. Different design ideas, capacity requirements, colors, and packaging preferences can be considered during development.

Reliable Cooperation Experience

Through cooperation with customers from different regions, the company has developed strong experience in handling international orders and understanding various market expectations.

These capabilities allow Yongkang Aijun Industry & Trade Co., Ltd. to provide comprehensive manufacturing solutions for businesses seeking dependable drinkware products.

Product Applications in Different Fields

The products manufactured by Yongkang Aijun Industry & Trade Co., Ltd. are suitable for a wide range of application scenarios. Their practical designs and durable structures make them useful for everyday activities, professional environments, and outdoor occasions.

In office environments, insulated bottles and tumblers provide convenient beverage storage solutions for employees who need reliable containers throughout the working day. Their portable designs allow users to maintain hydration while working or traveling between locations.

In outdoor activities, stainless steel drinkware products provide dependable performance for hiking, camping, sports, and travel. Their strong structures and convenient designs help users carry beverages easily during different adventures.

In educational environments, reusable bottles are commonly selected for students because they are easy to carry and suitable for daily use. Durable materials also help support repeated usage.

In commercial applications, customized drinkware products can serve as promotional items, corporate gifts, or retail products. Businesses can select different designs and customization options to create products that match their brand image and customer preferences.

The company's products are applied in areas such as:

- **Daily household use**
- **Office environments**
- **Outdoor activities**

● Sports and fitness scenarios
● Travel applications
● Promotional projects
● Retail markets

By developing products suitable for different situations, Aijun provides flexible solutions that match the needs of various customer groups.

Conclusion

Yongkang Aijun Industry & Trade Co., Ltd. is a professional manufacturer dedicated to producing reliable stainless steel drinkware and lifestyle products. With strong manufacturing experience, advanced production capabilities, strict quality management, and continuous innovation, the company provides practical solutions for customers in domestic and international markets.

From product design and material selection to manufacturing and customer service, Aijun focuses on every detail to ensure stable performance and customer satisfaction. The company's commitment to improvement allows it to respond effectively to changing market demands and develop products that support modern lifestyles.

By combining technology, craftsmanship, and customer-focused service, Yongkang Aijun Industry & Trade Co., Ltd. continues to strengthen its position as a dependable manufacturing partner. The company will continue investing in innovation, improving production capabilities, and creating valuable drinkware solutions for customers around the world.

For customers seeking professional manufacturing support, customized product development, and reliable drinkware solutions, Yongkang Aijun Industry & Trade Co., Ltd. provides comprehensive cooperation opportunities.Learn more about the company and its product solutions by visitinghttps://www.aijunware.com/
